UrbanStone is produced in Antique White color only. We recommend Sherwin Williams Loxon XP if other colors are required.

NEW PRODUCT

\$\$\$

Stonetile is the most  
ideal Exterior Product  
for North America's  
Woodframe Buildings!

### **Only our Product can make all these claims**

1. Is mechanically fastened;
2. Has a 10 mm rainscreen airspace;
3. Has a CCMC number (12886-R);
4. May be installed in all kinds of weather;
5. Is priced lower than competitive products;
6. Line comprises of panels and moldings;
7. Is hail-proof;
8. Has a very small carbon footprint;
9. Does not need expansion joints;
10. Is guaranteed for 25 Years;
11. Stonetile has been in operation since 1988;

### **Stonetile has 12 benefits:**

1. Mechanically fastened stone products cannot fall off the walls, (no mortar failures).
2. Rainscreen prevents moisture from getting into the walls, preventing mold and rot.
3. Only products which have been extensively engineer tested receive CCMC approval.
4. Concretes made of real crushed stone, not of lightweight materials last longer (much denser).
5. Stonetile can be installed in all weather without heated hording, saving money,
6. Our reasonable prices provide savings when compared to other products.
7. Designer options with, so much to choose from (stone panels and moldings).
8. Stonetile withstands devastating hailstorms without any damage reported.
9. We use local material in our product, saving Trees. Our products contain no plastics.
10. Unsightly expansion joints are not needed with our product (patented technology).
11. Our 25-year product warranty will give you peace of mind.
12. We are looking forward to our next 30 years of customer service.

**Stonetile,  
the only  
Concrete  
Molding  
Product  
with a  
built-in  
Rainscreen  
Airspace.**

Stonetile offers a full line of beautiful moldings which are also mechanically fastened. Ask us for our detailed catalog. There is so much to choose from.

**Quirk  
Corners.**

Stonetile utilises Quirk corners. These type of corners have been in use by craftsmen for many centuries. This method prevents butt joints when moldings are part of the design. It also prevents notorious corner breakage.
